SECTION-D

12 **Read the following passage carefully and answer the following questions:** **1+1+2=4**

Different landforms on the Earth's surface are formed by erosion, deposition and volcanic activities. The three major landforms on the Earth's surface are: mountains, plateaus and plains. Mountains are highly elevated steep landforms. They influence the climate and acts as the natural climatic barriers. Plateaus are elevated flat-topped regions, rich in mineral resources. Plains are low-lying flat areas formed by river deposits, thereby making them fertile and suitable for human activities. These landforms play a significant role in human settlement, agriculture, transportation and economic development.

12.1 Name any **two** major landforms on the Earth's surface. Which landform is rich in mineral resources?

12.2 Mention any **two** significant role of landforms.
